

*Fabricators of contemporary stone surfaces*

## **Thank you for your countertop purchase!**

We will measure, fabricate and install the new countertops that will make your space look amazing. It takes over 15 steps to make a new countertop from measure to installation. The first step is the measure. The measure is the key for a successful installation and you play a very important role here.

### **ARE YOU READY FOR MEASURE?**

Your tops will be made specifically to fit your cabinetry. The measure technician will take precise measurements and verify that your appliances and fixtures fit just right. Here's a [checklist](#) to determine if you are ready for measure:

- ✓ All cabinets, panels and walls are finished and permanently installed and secured.
- ✓ Sink and its manufacturer template are on site (unless we are providing)
- ✓ Faucet is on site
- ✓ Specs for all the appliances that go on your countertops are on site (cook top, slide-in range, etc.)

If you are still waiting for one of the above, you are still not ready.  
If you checked all up, give us a call because you are ready for a measure appointment!

### **PREPARE FOR THE MEASURE APPOINTMENT**

Your input and decisions are important for the final result of YOUR new countertops.

#### **Do's**

- Be on site the whole time during the measure
- Remove all items for your countertops
- Keep pets away from the area
- All cabinets are ready, sink, template faucet and appliance specs are in area.

#### **Don'ts**

- Don't take the responsibility of wanting a measure for non-installed cabinets or unfinished walls. This only leads to mistakes, frustration and delays.
- After the measure, you should not move, add or adjust any cabinet or wall because your new countertops will not fit anymore
- Don't hold back any questions or doubts
- Don't make any decision changes after the measure.
