

SenSa® Granite Quick Reference Guide

What is Granite?

- One of the most popular natural stones in the market today
- Exceptionally strong and durable; ideal for everyday indoor use and well suited for exterior applications
- Unique variations in pattern and color not found in other natural stones (colors vary from slab to slab, even within a single slab)

Benefits of SenSa Granite

- Maintenance-free premium granite
- Backed by Cosentino, a world leader in the natural stone industry for over eighty years
- 15-year stain warranty
- No special cleaners and no sealing required
- Superior stain protection with SenGuard® Technology

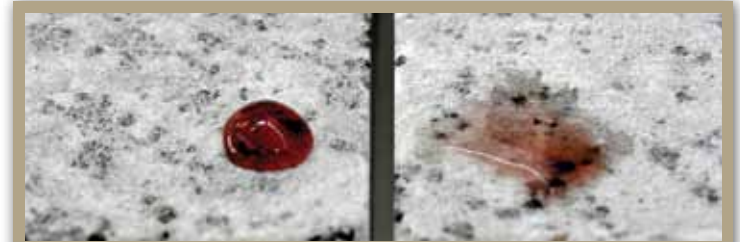

The SenGuard Technology is a proprietary stone treatment that is used to protect SenSa Granite from staining. SenGuard is not a sealer and bonds to the granite surface differently than regular natural stone sealers.

SenGuard Is:

- Chemical Resistant - Will withstand the use of typical household cleaners such as Windex® and 409®
- Worry-Free Use - Heated substances such as water, oil or hot pots and pans will not harm, change or effect the SenGuard protection
- UV Resistant - Suitable for outdoor applications
- Transparent - Will not affect the stone's natural, beautiful color
- GreenGuard Certified - Safe for indoor environments

The SenSa Granite Difference:

SenGuard protected granite repels liquids and prevents staining; Non-treated granite pieces absorb liquid and stain the stone

SenGuard is so effective that even liquids won't penetrate a mound of sand that has been treated

Difference Between SenGuard and Common Stone Sealers

SenGuard Technology	Common Stone Sealers
No sealing required	Requires yearly re-application of sealer because sealer breaks down over time.
Enters stone lattice and chemically bonds, allowing stone to breathe	Covers stone surface by entering pores and does not allow stone to breathe. Creates a thin layer on top of the stone.
SenGuard remains bonded for 15 years and is under stain warranty	Sealers break down over time and need to be reapplied to protect stone from staining.
No special cleaners required. Common household cleaners do not affect the SenGuard protection	Common household cleaners break down sealer protection.
Proprietary treatment applied by certified SenSa applicator	Sealant applied by consumer or paid professional installer.

SenSa granite has been GREENGUARD Indoor Air Quality Certified® by the GREENGUARD Environmental Institute under the GREENGUARD Standard for Low Emitting Products. All GREENGUARD Certified Products have been tested for their chemical emissions performance and can be found in the GREENGUARD Online Product Guide.
